

Science 10 Project - Clean Energy or Green Energy

Find the following definitions and write the answers in your own words. Don't forget to indicate your sources of information. You need to understand the difference between the two terms since it will be evaluated on the next test.

Terms	Definitions	Sources
Clean energy		
Green energy		

Prepare a presentation (PowerPoint or video) that includes your research on a technology OR initiative that is related to these types of energy. Your research should include the following components:

1. Your definitions from above (2pts)
2. A detailed description of the technology or initiative. (2 pts)
3. What is the purpose of this technology or initiative? (2 pts)
4. Where is it used? (2 pts)
5. Is it related to clean energy or green energy (or both)? Why and/or How? (4 pts)
6. What are the advantages and disadvantages? Be sure to describe why these are advantages and disadvantages. (4 pts)

The presentation can be done in PowerPoint or with a video that will be shared in the Posts so that your information is available to the rest of the class. The presentation will be evaluated according to the following criteria:

1. Visual appearance (2 pts)
2. Clear and comprehensive information (2 pts)
