

Offering employers wage subsidies of 50% of a participant's wages to a maximum of \$5,000 for a training period of up to 20 weeks.

Canada currently faces a critical shortage of skilled workers and is in need of Industrial Millwright Mechanics, Industrial Electricians and General Maintenance. Skilled tradespeople in the manufacturing sector are in high demand and will continue to be at an increasing rate because of the rapid pace of technological changes in our industry and as current workers begin to retire.

WILWorks Skilled Trades in Advanced Manufacturing is a pre-apprenticeship program for youth (15-29) to help manufacturers create a pipeline of talent to fill the growing demand in manufacturing skilled trades roles. For youth, the program will help them discover and learn introductory mechanical and electrical skills, along with hands-on training in skilled trades related to advanced manufacturing.

The program has been designed to be highly flexible for employers and participants. Training is delivered through online-self-directed modules and learners are guided through hands-on practical components by your organization's skilled mentors.

HOW IT WORKS:

Application – Kickstart the process by submitting your application. We're ready to guide you through the rest.

Enroll a Learner – Select a current employee or new hire and embark on a journey of growth and skill-building.

Complete the Program Requirement – Fulfill the program's requirements and get your wage subsidy.

HOW TO APPLY:
