**Centres of
Excellence**
PARTNERS IN EDUCATION

WHAT ARE THE CENTRES OF EXCELLENCE?

The Centres of Excellence are designed to support teacher practice and student learning. The initiative aims to reimagine how K-12 students learn about New Brunswick career opportunities and increase career readiness by connecting them with virtual and experiential learning opportunities, and decrease the levels of separation between teachers and experts. Virtual resources and experiential learning opportunities can be accessed through the Centre of Excellence website or by contacting us directly at COE@gnb.ca.

ENHANCED COOP PROGRAMS FOR STUDENTS INTERESTED IN HEALTH CARE AND EDUCATION

Students interested in participating in Coop 120 have the option to enroll in one of the enhanced coop programs that is being offered – Long Term Care Coop or Early Childhood Education Coop. These programs offer professional certification and are a great option for students who are planning to join the workforce immediately after graduation, or for students who are planning to pursue post-secondary education in the healthcare or education sectors.

The Long Term Care Coop Program allows students to complete a coop placement in a long term care facility while also completing an online course to earn the Resident Assistant certification. Students receive credit for the online Resident Assistant program via the Health Services 110 course. Students spend several mornings a week in their online course learning the skills required to be a Resident Assistant and work in a Long Term Care facility under the supervision of medical professionals to put their knowledge into practice by completing tasks and practicing skills related to their learning. Long Term Care Coop is available in any anglophone high school in New Brunswick that offers Coop 120. Long Term Care Coop is available in the winter term; the program is only available in the mornings.

The Early Childhood Education Coop program allows students to complete a coop placement in a licensed Early Childhood Education center while completing an online course to earn the Early Childhood Certificate. Students receive credit for the Early Childhood Certificate via the Early Childhood Services 120 course. Students spend one to two coop periods a week working on their online course learning the skills required to work in an Early Childhood Education facility. The other coop periods are spent at an Early Childhood Education facility working under the supervision of trained ECE staff to put their knowledge into practice by completing tasks and practicing skills related to their learning. Early Childhood Education Coop is available in any anglophone high school in New Brunswick that offers Coop 120 in the winter term.

CENTRE OF EXCELLENCE FOR ENERGY

RENEWABLE ENERGY WEEK

Renewable Energy Week is coming! Join us from December 13 to 17 for a series of webinars exploring renewable energy in New Brunswick.

Sessions brought to you by Renewables NB, EOS Eco-energy, The Gaia Project, Brilliant Labs and the Centre of Excellence for Energy.

During Nuclear Science Week, students in Mme. McFee's class at Magnetic Hill School learned about 12 careers in the energy sector they may not have considered and won an NBCC prize pack!

NSW recordings can be found [here](#).

PARTNER SPOTLIGHT

The Center of Excellence for Energy has partnered with the Atlantica Centre for Energy to help provide experiential learning opportunities and resources directly to students. The Atlantica Centre for Energy is a critical partner in supporting the Centre's mandate of increasing energy literacy and showcasing energy sector opportunities. Recently, Atlantica worked with the COE for Energy, as well as NB Power, during Nuclear Science Week to provide online resources and connect students in grades 6-12 with clean energy educators and nuclear science experts. This provided a unique learning experience about contribution, innovations, and opportunities in energy. We look forward to this partnership and helping students discover what's possible in the energy sector.

MENTAL HEALTH LITERACY DECEMBER 8TH, 2021 3:45-4:15

Are you a teacher interested in increasing your own mental health literacy? Would you like to teach mental health as part of your middle school Health 7/8 or high school PDCP 9/10 class (or incorporate components of it into other courses)? Do you have experience using the mental health curriculum guide and would like a self-guided refresher on some of the content?

If you answered yes to any of these questions, the following information session is for YOU! The COE for Health is thrilled to partner with ASD-N's Mental Health Mentor and Mental Health Literacy Key Trainer, John B. Fletcher. John will guide you through the FREE online course from the University of British Columbia that aims to increase mental health literacy and offer resources on how to use the curriculum guide with students.

Join John Fletcher (ASD-N) and the COE for Health for a virtual webinar on December 8th from 3:45 PM – 4:15 PM. This session will be recorded, for those who are unable to attend.

OUTDOOR LEARNING WITH BRENDAN MCGUIRE DECEMBER 9TH, 3:45-4:15

Did you know that, no matter where you are in New Brunswick, you are never more than an hour away from a provincial park? The COE for Health is thrilled to partner with Parks NB and the Department of Tourism, Heritage and Culture as we explore student learning in outdoor settings. Join us virtually and learn about activities and educational field trips that have occurred in the past at our NB parks. We will also explore and discuss options for your school or your classroom and the benefits of learning outdoors.

Join Brendan McGuire from the NB parks with the department of Tourism, Heritage and Culture and the COE for Health virtually (Teams) on December 9th from 3:45-4:15.

MINDFULNESS 101 DECEMBER 14, 2021 3:45-4:15

Are you a teacher interested in Mindfulness and Mental Fitness? Mindfulness is a state of active, open attention on the present moment. When you're mindful, you observe your thoughts and feelings from a distance, without judging them good or bad. Instead of letting your life pass you by, mindfulness means living in the moment and awakening to experience. Do you want to learn more about the power of mindfulness in the classroom and the Mental Fitness CARR Model?

Please join Daneen Dymond, the lead for Centre of Excellence for Health virtually on Teams, December 14, 2021 from 3:45-4:15.
